Memjet's European Union REACH, RoHS, and SVHC Statement

Memjet's Shipping Fluid, System Cleaning Fluid, and Part Washing Fluid are covered by the below statements:

In compliance with Regulation (EC) No.1907/2006 of the European Parliament and of the Council of 18th December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), Memjet will continue to ensure that fluid formulation components shipped from Memjet, or Memjet manufacturing and/or refilling partners into the European Union (EU) in amounts over 1 tonne are registered. Such registration will cover all downstream users of these Memjet products.

The EU's Restriction of Hazardous Substances (RoHS) Directive 2011/65/EU (known as RoHS 2) was amended by Directive (EU) 2015/863 and is now commonly referred to as RoHS 3. Memjet's fluid products are compliant with RoHS 3. This determination of compliance was made after a review of all RoHS restrictions, examination of all fluid raw materials, and the fact that no RoHS restricted materials are intentionally added to the fluid formulations.

Substances on the European Chemicals Agency Candidate List of Substances of Very High Concern for Authorisation (SVHC) are not intentionally added to Memjet fluid products.

Also, no bisphenol-A (BPA), MOSH/MOAH, or phthalate esters, or per- and polyfluoroalkyl substances (PFAS), are intentionally added to Memjet fluid products.

Best regards,
